SUMMARY

Manual QA Engineer with 4+ years of experience testing web and mobile applications, including functional, regression, exploratory, and negative testing; API, backend, database, and system integration testing (payment systems, LMS); test automation with Cypress. Experienced in creating and maintaining test documentation (test cases, checklists, test plans, bug reports) and in using AI tools in daily QA work.

SKILLS

- Testing: functional, regression, smoke, exploratory, negative, integration, cross-browser, web and mobile (iOS/Android), accessibility, performance testing
- API and backend: REST/GraphQL API testing (Postman, Swagger, Apollo GraphQL), Chrome DevTools (Network, Console, Elements, etc.), client-server architecture, MS SQL, Firebase, logs (Azure Portal, Luigi, Flower)
- Automation: Cypress (JavaScript)
- Tools: Jira, Confluence, Azure DevOps, Trello, Notion, Visual Studio, GitHub, Docker, Figma, WAVE, Locust, Clarity, Google Analytics, Stripe, Auth0
- Languages: English — Intermediate; Ukrainian — native

WORK EXPERIENCE

QA Engineer, Honeycomb Software Jun 2022 – Aug 2026
Projects:
EdTech: AI-driven assessment and feedback platform for higher education (NDA) · *Jan 2024 – Aug 2026*

- Created and maintained test documentation (checklists, test cases using common Test Design techniques, sprint and release reports in Confluence)
- Participated in test automation: built Cypress (JS) E2E tests (about 20 tests covered ~80% of critical flows) that reduced regression testing time and enabled early bug detection after deployment to the test environment
- Performed functional and regression testing of web applications; coordinated pre-release regression with the whole dev and business team and reported results in Confluence
- Tested APIs in Swagger, verified the integration between the main app and LMS, and data correctness; checked logs in testing environments (Azure Portal, Luigi, Flower); monitored user activity (Clarity, Google Analytics)
- Collaborated with developers on performance testing using Locust and root cause analysis
- Performed accessibility testing using WAVE and updated the VPAT document
- Tested AI-driven features (LLM-based), collaborating with developers and prompt engineer / data tester
- Logged, tracked, and verified defects in Jira, providing clear and reproducible bug reports
- Hands-on experience using AI tools in daily QA work (Claude, Cursor)
- Tested and improved UI/UX during POC (proof-of-concept) development in Replit
- Onboarded new team members and demonstrated new features to stakeholders

Hunting and fishing booking platform / web and mobile (NDA) · *Sep 2022 – Dec 2023*

- Became the sole QA after mentorship from a senior QA
- Investigated issues across frontend, backend (Firebase), APIs (Apollo GraphQL), and integrations (Stripe payment system, Auth0)
- Tested the iOS app via TestFlight and UI/UX against Figma designs
- Created test documentation: smoke and regression checklists (for two environments, mobile, two product parts)
- Logged, tracked, and verified defects in Jira, providing clear and reproducible bug reports
- Onboarded the Automation QA engineer and collaborated on improving test coverage

Short-term projects and QA audits · *2022 – 2026*

- Established and executed QA processes on 10+ projects in various domains, including Agriculture, MedTech, Energy / Utilities, Media, Real Estate, E-commerce, Logistics, and Mobile applications
- Analyzed requirements and stakeholder needs; created requirements, user stories, and acceptance criteria; prepared test plans, checklists, and bug reports; ran exploratory testing → retesting and regression → quality report
- Testing: functional, smoke, and regression testing of web and mobile apps (Android, iOS); UI/UX checks against Figma designs; backend and API testing with Postman and Chrome DevTools

Internship · *Jun 2022 – Jul 2022*

- Assisted senior QAs in testing various websites (for music processing, social communication, and real estate rent management)
- Analyzing requirements
- Running existing test cases
- Exploratory and cross-browser testing, bug reporting

EDUCATION

- The Fundamentals of Software Testing, QATestLab Training Center (Jan 2022)
- Ivan Franko National University of Lviv — Master's, Economic Cybernetics (2021–2023)
- Ivan Franko National University of Lviv — Bachelor's, Information Technology in Business (2017–2021)

Basic knowledge: MS SQL; JavaScript / HTML / CSS; Power BI; Computer Networks
