Anastasiia Kviatkovska

Manual QA Engineer with 4+ years of experience in manual testing across web and mobile applications, specializing in API, database, payment flow, and data validation testing. Skilled in building E2E automation with Cypress, designing QA documentation from scratch, and collaborating with cross-functional teams. Known for strong attention to detail and the ability to adapt to new domains and ambiguous requirements.

- Flower / Luigi
- Locust
- Wave
- Figma
- Stripe

LANGUAGE:

- English - Intermediate

EDUCATION:

IVAN FRANKO NATIONAL UNIVERSITY OF LVIV

2021 - 2023
Master's Degree in Economic Cybernetics

2017 - 2021
Bachelor's Degree in Information Technology in Business

THE FUNDAMENTALS OF SOFTWARE TESTING IN QATESTLAB TRAINING CENTER
January 2022

EXPERIENCE:

QA Engineer at Honeycomb Software

EDUCATION COMPANY THAT PROVIDES A HYBRID HUMAN-MACHINE INTELLIGENCE SOLUTION
Jan 2024 - Aug 2026

- Performed various types of functional testing, including smoke, sanity, regression, and integration testing (with third-party services)
- Conducted performance and accessibility testing, followed by reports and VPAT creation
- Analyzed project requirements and designed test documentation, including test cases, checklists, bug reports, and sprint/release reports; maintained a library of 20-30 test cases per feature (>200 in total)
- Created and implemented E2E test scenarios using Cypress, covering all critical workflows; monitored test runs and identified issues
- Monitored user activity, data, and failed processes
- Worked closely with both business and development teams; organized regression testing activities across the entire team (up to 10 developers and engineers), ensuring effective collaboration, progress tracking, and clear reporting of results and issues
- Provided onboarding for 2 new QA team members

TRAVEL BOOKING PLATFORM DESIGNED FOR HUNTERS AND ANGLERS
Sep 2022 - Dec 2023

- Started on the project under the mentorship of a senior QA, then took over as the sole QA on the project
- Onboarded a newly joined Automation QA and collaborated closely with them on test coverage
- Focused primarily on database and API testing, along with payment flow testing
- Performed mobile application testing
- During a period when a designer was temporarily involved in the project, conducted extensive UI/UX testing, validating implementation against Figma designs (for Web and Mobile)
- Created standard QA documentation, including test cases, checklists, and bug reports

SHORT-TERM PROJECTS & QA AUDITS (OVERTIME)

- Machine-learning agronomy platform: requirements analysis, QA documentation, functional testing, bug reporting
- Engineers' business application (work orders, time tracking, reporting): functional/regression/smoke testing, bug reporting
- Energy AI platform for oil & gas: requirements, user stories, acceptance criteria, test cases, UI testing vs. Figma, bug reporting
- GPS tracking platform for environmental & equipment sensors: functional/smoke/regression mobile (Android & iOS) testing
- Documentation management system for cultivators: web & mobile (iOS) testing, bug reporting, customer demo meetings
- QA Audit - logistics platform (Carrier & Shipper apps): mobile testing (Android & iOS), and Quality report
- QA Audit - job search platform for doctors (admin, applicant, provider roles): web & mobile testing, and Quality report
- QA Audit - apartment booking platform (manager & renter roles): Exploratory testing and Quality report

INTERNSHIP
Jun 2022 - Jul 2022

- Assisting the senior QAs in testing various websites (for music processing, social communication, and real estate rent management)
- Analyzing requirements
- Running existing test cases
- Exploratory and cross-browser testing, Bug reporting
