Anastasiia Kviatkovska

QA Engineer | Web & API Testing | Cypress → Playwright | EdTech, Media, PropTech, Marketplaces
Rivne, Rivne, Ukraine

Summary

QA Engineer with 4+ years of experience in manual testing, mostly in web products (EdTech, marketplaces, PropTech), plus hands-on mobile testing on iOS and Android. Recently, I've also been working on automation with Cypress, prioritizing what to automate based on business needs, and I want to continue growing as an automation engineer. On my last project, I covered ~80% of critical flows with ~20 Cypress tests. We automated critical flows and demo flows first, because those are what the business can't afford to have broken. What I do: • Web testing: functional, regression, smoke, exploratory • API testing (REST, Apollo GraphQL, Postman, Swagger) and database checks • Integrations: Auth0, Firebase, Stripe, LMS • Cypress automation, with Playwright as my next step • Test documentation: bug reports, test cases, checklists, traceability matrices, quality/sprint/release reports • QA expertise across the product lifecycle, from requirements analysis to release and post-release validation. I'm currently deepening my knowledge of API testing and Cypress. Looking for a remote QA role where quality and automation are tied to business goals.

Experience

Honeycomb Software

4 years 3 months

QA Engineer

August 2022 - August 2026 (4 years 1 month)

Rivne, Ukraine

NDA/EdTech

- Testing an AI-powered product
- Build and maintain Cypress tests: ~20 tests / 80% of critical and demo flows covered
- Cover both functional and non-functional testing types: regression, smoke, API, data, performance, accessibility, UI

- Test the main app ↔ LMS integration
- Using Claude and Cursor in day-to-day work
- Monitor user activity and failed processes
- Lead regression cycles for the entire team (~5 people): planning, progress tracking, reporting

NDA/Travel Booking Platform (USA)

- API testing (Apollo GraphQL) and database testing
- Integrations covered: Auth0, Firebase, Stripe
- QA documentation: test plan, regression and smoke checklists, traceability matrix, dependency matrix

Short-term Projects (QA audits, overtime, between long-term projects)

- Delivered QA on 10+ short-term projects, from 1-month audits to 6-month engagements, adapting quickly to new domains and ambiguous requirements
- Domains: Agriculture, MedTech, Energy / Utilities, PropTech / Real Estate, Media
- Wrote requirements, User Stories and Acceptance Criteria; created test cases and checklists; analyzed Figma layouts
- Ran exploratory, regression, and smoke testing / API testing with Postman

Quality Assurance Intern

June 2022 - July 2022 (2 months)

Rivne, Ukraine

Hands-on internship across 3 domains: agriculture, music, and real estate

- Analyzed requirements and identified gaps and inconsistencies before testing started
- Ran exploratory and cross-browser/cross-device testing
- Reported and re-tested bugs
- Worked alongside senior QA engineers, supporting their testing and learning the full QA workflow

Education

Ivan Franko National University of Lviv

Master's degree, Economic Cybernetics · (September 2021 - December 2022)

Ivan Franko National University of Lviv

Bachelor's degree, Information Technology in Business · (September 2017 - June 2021)
